

Job Description – Automation Tester

📄 Company Name: OUM Technology Solutions

📄 Website: oumtech.com

📄 Job Title: Automation Tester

📄 Employment Type: Full-Time

📄 Job Summary

OUM Technology Solutions is looking for a skilled Automation Tester with strong hands-on experience in Playwright. The candidate will be responsible for developing and executing automated test cases, performing functional and regression testing, API testing, identifying defects, and ensuring the overall quality and reliability of web applications.

📄 Key Responsibilities

Design, develop, and execute automated test scripts using Playwright.

Create and maintain comprehensive test cases and test documentation.

Perform functional, regression, UI, and end-to-end testing.

Automate web application testing using Playwright.

Perform API testing using Postman or relevant API testing tools.

Identify, document, track, and verify software defects.

Execute regression testing after new releases and code changes.

Analyze business and technical requirements and prepare appropriate test scenarios.

Collaborate with developers, project managers, and other stakeholders throughout the SDLC.

Improve automation coverage and overall testing processes.
